

MAJLIS AI

+ ACCORD AI

The full GCC market-entry lifecycle: decide, enter, and execute.

Founder: **Fatima ezzahraa Safia Raghoui**

FOREIGN COMPANIES ENTER THE GULF

FRAGMENTED.

Regulatory readiness Requirements are found only after launch, when correction is most expensive.

Institutional specificity Most guidance treats the UAE as one market, missing Abu Dhabi vs. Dubai.

Partnership execution Finding the right local partner happens through scattered, ad-hoc outreach.

DECIDE, ENTER,

EXECUTE.

MAJLIS AI

Guided market-entry advisor. Eleven questions generate a full strategic brief: entry pathway, budget scenarios, cultural readiness, and regulatory flags — each with an inline source citation, so every claim is checkable, not just asserted.

ACCORD AI

Partnership-strategy advisor. Matches goals to real partnership archetypes and real, sourced partners from a self-collected 100-entry GCC directory — with an autonomous follow-up loop that checks in on each recommended connection weeks later.

REAL PRODUCTS.

NOT CONCEPTS.

GOLD

KANZ AI RATING

100

SOURCED PARTNERS

13+

SCENARIOS TESTED

Majlis AI is live, published, and rated Gold (≥ 80 , “hire-ready, exceptional”) by the Kanz AI programme’s independent assessment. Accord AI’s backend is fully built and tested, with a live frontend connected to real, self-sourced partner data.

A SELF-REINFORCING

LOOP.

ABU DHABI IS BUILDING

THIS ECOSYSTEM.

Sovereign AI ambition

Abu Dhabi aims to be the world's first AI-native government by 2027, backed by G42, MGX, and Mubadala-linked investment.

twofour54 + Hub71

Both actively courting the exact foreign tech and entertainment companies this platform serves.

Early-stage entertainment sector

Verified independently by Majlis AI's own market data — genuine white space, not a crowded category.

NO COMPETITOR COMBINES

BOTH LAYERS.

Generic market-entry consultancies

Expensive, slow, not repeatable, no AI-native product.

Generic AI business tools

Most rely on general training knowledge rather than a verified, curated regulatory reference — increasing hallucination risk on specific claims.

This platform

Regulatory-grounded market-entry AI, paired with real, sourced partnership-matching — specific to Abu Dhabi and the GCC.

WHERE THIS GOES

NEXT.

- **Phase 1 — Abu Dhabi depth**
Deepen ecosystem licensing with Hub71, twofour54, and ADIO as the anchor distribution channel.
- **Phase 2 — Referral network scale**
Formalize the law firm and agency referral network into a structured, revenue-generating partner program.
- **Phase 3 — GCC expansion**
Extend verified regulatory and cultural logic beyond Abu Dhabi into Saudi Arabia.
- **Phase 4 — Deeper localization**
Khaleeji-dialect Arabic calibration and expanded sourcing directory coverage across all four partnership archetypes.

BOOTSTRAPPED.

SEEKING HUB71.

Previous funding

Self-funded. No institutional or friends-and-family round to date — approximately \$210 personally invested in premium tooling (Claude Pro, Gemini Pro, Replit, Lovable, n8n) to build both products to a genuinely production-tested standard.

Amount raised to date

\$0 — both products built and tested independently, at personal cost of time only.

What we're seeking

Hub71 Initiate's venture-building support as our first structured backing — not a cash-first ask, but hands-on validation and market access.

SAFIA **RAGHOU.**

GLOBAL GROWTH MANAGER & MARKET ENTRY STRATEGIST

7+ years scaling Korean and Asian platforms across MENA — Hyperconnect, SpoonLabs, OutInFuture, Scatter Lab. Lived experience across the full market-entry lifecycle: greenfield launch, crisis recovery, regional expansion, and a structured 60-day regulatory wind-down. Independently designed and built both products end-to-end, including sourcing the real 100-entry GCC partner directory powering Accord AI.

BUILDING THIS FROM

ABU DHABI.

Safia Raghoui is committed to relocating long-term to Abu Dhabi and building this venture from within the Hub71 / ADGM ecosystem.
