PARTNERSHIP STRATEGY

FOR THE GCC

PARTNERSHIP SOURCING IS AD-HOC

No structure — Companies find partners through scattered, informal outreach.

No evaluation — No consistent way to score or compare potential partners.

No follow-through — Introductions happen once, then go quiet.

A REAL, SOURCED PARTNERSHIP ADVISOR

Matches a company's goals to one of four real partnership archetypes, then recommends real, sourced partners from a self-collected 100-entry GCC directory. Includes KPI alignment — your goal versus the likely partner's goal — and negotiation guidance specific to the deal type. An autonomous follow-up loop checks in on each recommended connection weeks later.

TOOLS USED

BUILT WITH

Backend — n8n workflow orchestration, Google Sheets live directory

AI Engine — Google Gemini, grounded to real, sourced data only

Frontend — Lovable, connected via live webhook

A DIRECTORY BUILT BY HAND, NOT INVENTED

100 real entries spanning influencer agencies, casting platforms, content licensing studios, and talent development agencies across the UAE, Saudi Arabia, Qatar, and Kuwait — clearly sourced from firsthand experience or independent research, never fabricated.

WHERE THIS GOES

Referral network — Formalizing real partnerships with agencies already in the directory

Citations — Extending inline source citations to regulatory risk flags

Scale — Expanding the follow-up loop with a second check-in tier
