FOREIGN COMPANIES ENTER THE GULF FRAGMENTED

Regulatory readiness — Requirements found only after launch, when correction is most expensive.

Institutional specificity — Most guidance treats the UAE as one market, missing Abu Dhabi vs. Dubai.

Partnership execution — Finding the right local partner happens through scattered outreach.

A GUIDED MARKET-ENTRY ADVISOR

Eleven questions generate a full strategic brief: entry pathway, budget scenarios, cultural readiness, and regulatory flags — each with an inline source citation, so every claim is checkable, not just asserted. Grounded in verified public regulation, not AI guesswork. Available in English and Arabic.

TOOLS USED

BUILT WITH

Platform — Replit, Agent-assisted development

AI Engine — OpenAI API, grounded live generation

Delivery — Bilingual output, PDF export, automated Resend email

TESTED

STRESS-TESTED, NOT DEMOED ONCE

13+ scenarios tested, including deliberate negative-case testing — confirming flags correctly stay absent when not applicable. Independently rated Gold (“hire-ready, exceptional”) by the Kanz AI programme.

WHAT'S NEXT

WHERE THIS GOES

Accord AI — A partnership-scoring framework for the Gulf

GCC expansion — Extending verified logic beyond Abu Dhabi into Saudi Arabia

Deeper localization — Khaleeji-dialect Arabic calibration
